

CASE STUDY

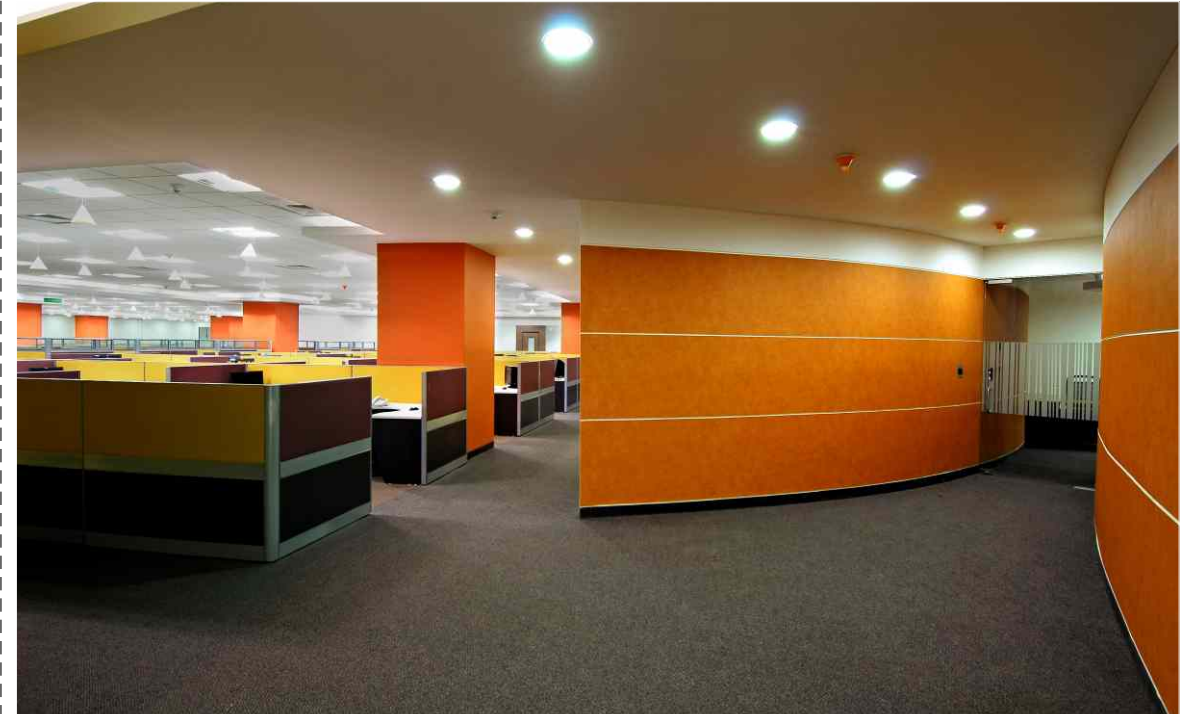

+ Main reception

COGNIZANT
Mumbai, INDIA.

Office area

Corridor

Brief:

Cognizant Technology Solutions is an information technology services company with their headquarters in New Jersey, USA with significant operations in India. In its quest to excel and expand, Cognizant proposed to set up an office facility in Mumbai.

Location:

Powai - Mumbai

Area:

45,000 sq.ft.

Cognizant's Outlook:

Being an IT company, Cognizant was highly sensitive about their security & networking cable systems. They wanted Sankalpan to complete the project within 40 days without compromising on quality.

Conference room

TYPICAL FLOOR PLAN

Challenge:

The major challenges were to provide a headcount of 600 seats on a floor area of 45,000 sq.ft. and to complete the work within 40 days.

Execution approach:

The requirement of Cognizant was efficiently managed by providing ceiling mounted AHU that gave additional space. Glazed partitions with patch fitting were used instead of wood & wooden members, so as to accelerate the work.

Uniqueness of the design:

The office is divided into 6 zones designed in such a way that any zone if required to be separated from the rest of the office on a later date, could be made possible because of the vertical modularity of the workstations. The glazed elements used helped to create illusion of spaces.
